# ★ What Makes a Good Website?

Use Google Advanced Search to Find Websites

Go to Google Advanced Search (search Google Advanced Search to find it.)

Use some of these possible search techniques to find some attractive websites about the class learning. Open the links in new tabs so you can easily navigate to them (right click, open in new tab):

Evaluate the Websites

Use the following boxes to evaluate the webpages. Remember to think about:

- The colours used.

- The font type, size and colour.

- How images are used.

- How animation or video is used.

- The overall layout of the pages, including columns of text/ images.

- How the site is organised, including how easy it is to navigate around the site.

Website: _____

Address (URL): _____

Good Features:

1. _____

2. _____

3. _____

One feature you might change:

_____

What Makes a Good Website?

Use Google Advanced Search to Find Webpages

Go to www.google.co.uk.

Use some of these possible searches to find some attractive webpages about the class learning. Open the links in new tabs so you can easily navigate to them:

1. Search this exact phrase using inverted commas:

_____

2. Search _____ excluding the word _____ .

3. Search this website: _____ for _____ .

You could use the Google Advanced Search to annotate results with reading level results.

Evaluate the Web Pages

Use the following boxes to evaluate the webpages. Remember to think about:

· The colours used.

· The font type, size and colour.

· How images are used.

· How animation or video is used.

· The overall layout of the page, including columns of text/ images.
